ABSTRACT:

    PROBLEM TO BE SOLVED: To use template data adding
processing logic data in
the same way as screen data and also to register screen data
(adding processing
logic data) generated by a user as a template in an
application development
tool.

    SOLUTION: When new screen generation is selected by a menu
in a template
control part 2a controlling a whole template processing, a
template retrieving

part 2b retrieves the template from a template data file and displays template
names by sight in a template sight display part 2c. At this time, a
normalscreen is also displayed so as to be selection possible in a same level.
A template selecting part 2d selects the template to be added to an application
and selected template data selected is converted into screen data and
processing logic data by a template data converting part 2e.
